

THE 5 GAPS MOST BRANDS MISS

(And How To Fix Them Today)

GAP 1 -- You can't say what you do in one sentence.

If your positioning takes a paragraph, you don't have positioning.

Tighten it: who you serve, what you change for them, what's different.

GAP 2 -- Your voice drifts across channels.

Your website sounds different than your Instagram than your pitch.

Pick one voice. Train every channel to it.

GAP 3 -- You're invisible to AI search.

ChatGPT, Perplexity, and Google AI Overviews now drive discovery.

Slow JS-heavy sites disappear from those answers.

GAP 4 -- You are the system.

If everything stops when you step away, you don't have a brand.

You have a job. Document, delegate, automate.

GAP 5 -- You can't name why someone picks you.

If you can't say it in one sentence, neither can they.

Find it. Lead with it.
